Owner: Public Service  
Company of New  
Hampshire  
Location: Bowe, New Hampshire  
Project: Limestone-handling  
system  
Construction: Began in 2010  
In Service: 2011  
Total Value: \$11 million

In 2009, we contracted to detail, fabricate, and install the structural steel and provide the silo tunnel concrete on this limestone-handling project. There are nine different conveyors, five of which are tubular gallery conveyors which vary from 9'6" to 10'6" in diameter. The length of these tubular gallery conveyors is more than 1,600 feet and their capacity varies with speeds up to 1,400 tons/hour. This project was completed in 2010 and included more than 2.5 million pounds of fabricated steel.
